

Atelier 2

Huddle in Style. Power for Productivity.

Atelier 2 is an elegant soft seating program that brings functional design together with privacy to create dynamic spaces for meeting, eating or focus work. Available as a two or three seat sofa, with segmented seat and back cushions or pillows, Atelier 2 can also be combined with a connecting wall to create huddle stations, with optional peninsula table. The surface mount power with duplex and USB outlets are options that allow users to recharge their devices, while the connecting wall can be specified with a TV mounting bracket and zippered channel to conceal an LED/LCD power cord.

no stitching

Private Solutions. An Indoor Retreat.

Atelier 2 is available in a phone booth option that provides a private seating solution to open office environments and is the perfect complimentary piece to any existing Atelier 2 model. Ideal for making phone calls, working in a quiet space, or for any individual work, the phone booth walls provide both acoustic and visual privacy for those who crave solidarity throughout the work day. For open areas where visual and acoustic privacy are not required, Atelier 2 is now available as a sofa sectional with 29" high walls.
