

Highway

DAUPHIN

Striking in Form. A True Classic.

The recipient of many design awards since its 2002 introduction, Highway conference and visitor chairs continue to deliver comfort with refinement. Equipped with an elegant die-cast swivel tilt that matches the gleaming back frame, this simple recline control can be locked in the upright position. The back can be upholstered in eight classic Attimo mesh colors or fully upholstered, while the sumptuous seat can be finished in any fabric. Available standard with a polished aluminum 5-star base and soft black poly arm pads, the Highway Conference Chair is a highly respected performance chair with timeless aesthetics.

DESIGN: Martin Ballendat

Top Quality Craftsmanship. High Performance Achieved.

At the very core of Highway is its beautifully designed back in polished aluminum. Eight mesh colors highlight this exquisite detail, or if preferred, the back can be fully upholstered. With its contoured seat and waterfall front edge, Highway delivers comfort and beauty to the user. The cantilever base visitor's chair comes standard with a polished metal frame and soft black poly arms. This is truly a chair whose timelessness and top quality craftsmanship will stand the test of time.
